Psych. 440 Chapter 3 Quiz

_____ 1. I reviewed the PowerPoint presentation for this chapter.
   A. True
   B. False

_____ 2. The lateral geniculate nucleus projects to _______ along the Primary Visual Pathway.
   A. Superior Colliculus
   B. Pulvinar Nucleus
   C. Retina
   D. Primary Visual Cortex

_____ 3. Cones are photoreceptive cells in the eyes which are used primarily for low light vision.
   A. True
   B. False

_____ 4. _______ is failure to detect signal due to inattention, despite visual fixation.
   A. Change blindness
   B. Color blindness
   C. Inattention blindness
   D. None of the above

_____ 5. Gestalt organizing principals of pattern recognition include
   A. Continuity
   B. Closure
   C. Similarity
   D. All of the above
6. Feature analysis model based more closely on brain function. Both top-down (incorporating context effects) and bottom up (critical features) influences.

   A. True
   B. False

7. Which of the following is a feature of Recognition by Components?

   A. Basis on complex forms
   B. Simple 3D geometric forms called geons
   C. Very top-down
   D. All of the above

8. The inability to coalesce features into meaning whole (object or form) is

   A. Apperceptive agnosia
   B. Prosopagnosia
   C. Associative agnosia
   D. None of the above

9. All of the following are located the middle ear

   A. Cochlea
   B. Auditory nerve
   C. Balance nerve
   D. Incus

10. Lower frequencies are processed near the base of the cochlea.

    A. True
    B. False
